## Problem Description:

How to fill colors in shapes using Applet?

## Solution:

Following example demonstrates how to create an applet which will have fill color in a rectangle using setColor, fillRect methods of Graphics class to fill color in a Rectangle.

```
import java.applet.*;
import java.awt.*;

public class fillColor extends Applet{
    public void paint(Graphics g){
        g.drawRect(300,150,200,100);
        g.setColor(Color.yellow);
        g.fillRect( 300,150, 200, 100 );
        g.setColor(Color.magenta);
        g.drawString("Rectangle",500,150);
    }
}
```

## Result:

The above code sample will produce the following result in a java enabled web browser.

A Rectangle with yellow color filled in it will be drawn in the browser.
